

EUROSTRIP PAINT REMOVER

PRODUCT CODE-9100

● Description

EUROSTRIP PAINT REMOVER , which removes all types of paints without leaving any scratch marks. It is essentially a compound, consisting of fast evaporating solvents, wax and penetrants. The wax covers the solvents while the penetrants get underneath the paint film. The old paint film either softens, as in the case of convertible coatings like N.C. or chlorinated rubber or plastic emulsion paints while blisters are formed when the coating is non-convertible like enamels including stoving enamels, epoxies and PU finishes. The softened or blistered paint can be easily wiped off using a spatula or even a rag pad.

● Areas of Application

Any surface, steel wood or wall that needs repainting.

● Surface Preparation

None

● Technical Data

- Appearance : Translucent viscous liquid.
- Viscosity : Brushable
- Thinner : None
- Time taken : 5-15 minutes depending upon the coats of old paint film.

● Directions for Use

Brush liberal quantity of EUROSTRIP on the surface of old paint and wait for 10-15 minutes. The plastic emulsion and N.C. paint films will soften. Remove them using spatula. Other paint films will blister and can be removed very easily. When many coats of old paint are to be removed, EUROSTRIP has to be applied twice or thrice.

● Notes

EUROSTRIP containers develop pressure because of very fast evaporating solvents. Therefore, the containers must be opened carefully, with eyes away from the lid. Avoid skin contact to prevent irritation. In case of any splash on the skin, wash immediately with water.
